PROFESSIONAL SUMMARY

A Software Engineering graduate with hands-on experience in Dynamics 365 CRM, D365 Finance & Operations, Power Platform, Power BI, and database technologies including MS SQL Server and MySQL. Skilled in X++, C#, JavaScript, Python, HTML, and CSS, with practical experience in D365 F&O customizations, Power BI reporting and data visualization, ASP.NET Core MVC, Flask, and database development using SQL Server and MySQL. Experienced in SQL querying, database design, data management, and developing scalable, secure, and efficient business and web applications tailored to business requirements.

CORE COMPETENCIES

Python | C# | JavaScript | Power Apps | Power BI | SQL Server | HTML/CSS | Flask | D365 F&O | X++ | SSRS

PROFESSIONAL EXPERIENCE

Mazik Global

D365 F&O; Developer — Dec 2025 – Present

- Designed and customized tables and forms, including defining relationships, using custom EDTs, adding data sources, and enabling CRUD operations with extensions of OTB tables.
- Applied X++ basics to write runnable classes for insert, update, and delete operations.
- Used and customized Data Entities for import/export.
- Implemented batch jobs for automated Free Text Invoice generation.
- Worked with SSRS reports, customizing both OTB and Custom reports.
- Created menu items and menus, integrated them into modules.
- Performed unit testing and functional testing of developed X++ customizations, Forms, Tables, and SSRS Reports before deployment.
- Tested developed features against business requirements and fixed identified issues before moving changes to UAT.

CubePeaks Technology

Power Platform Developer — Jul 2025 – Nov 2025

- Developed and maintained Power BI reports and dashboards to visualize key business metrics and support data-driven decisions.
- Integrated and transformed data from multiple sources using Power Query and DAX for creating dynamic visuals.
- Worked on invoice capture in Dynamics 365 F&O; including matching, transferring, and voiding invoices to ensure accurate financial processing.
- Assigned and managed security roles for users in Dynamics 365 F&O;, including migrating roles from UAT/Sandbox to Production and configuring duties, privileges, sub-roles, and table permissions.
- Created flows in Power Automate and used the Power Automate visual in Power BI to improve reporting and automation.
- Worked on D365 F&O; Forms, Tables, SSRS Reports, and X++ customizations.
- Performed unit testing and functional testing of developed F&O; customizations and fixed identified issues before UAT.

Arch Technologies

Machine Learning Intern — Apr 2025 – Jun 2025

- Using Flask framework built a web application where users can input data and receive real-time predictions from a machine learning model trained on a CSV dataset.
- Utilized Python libraries including NumPy, Pandas, and Scikit-learn for data cleaning, analysis, and building a predictive model.
- Visualized a dataset using Seaborn & Matplotlib — created detailed statistical plots including bar charts, heatmaps, and histograms to explore trends, correlations, and data distribution.

FastPace Dynamics

Software Engineer – Intern — Oct 2024 – Dec 2024

- Performed SQL querying to extract, manipulate and analyze data from different databases, optimizing performance and ensuring accurate reports.
- Worked with Power BI to create interactive dashboards and reports for various projects, transforming raw data into meaningful insights.
- Developed DAX functions and custom measures to enhance data analysis and provide dynamic, real-time reporting solutions.
- Worked on D365 F&O; development using X++, including Forms, Tables, and Reports.
- Assisted with F&O; customizations, unit testing, and functional testing before UAT.

Mazik Global

Power Platform – Intern — Jul 2024 – Aug 2024

- Designed and developed a Customer Feedback Management System using ERD, Dataverse, Canvas App, and Model-Driven App.
- Automated workflow with Power Automate to streamline feedback processing.
- Completed Microsoft Learn modules for Power Apps.

Inferifi LLC

Dynamics 365 CRM & Power Platform – Intern — Jul 2022 – Sept 2022

- Worked with MS SQL Server, C#, and JavaScript to perform CRM and development tasks.
- Created calculator and stopwatch using JavaScript.
- Built database tables and executed operations like joins, create, update, and insert.

EDUCATION

Bachelors in Software Engineering — Usman Institute of Technology (2019 – 2023)

Pre-Engineering — Govt. Delhi College (2016 – 2018)

CERTIFICATES

Artificial Intelligence — PIAIC | March 2023

Microsoft Dynamics Training CRM — KAISPE Academy | June 2024

Introduction to Power BI — DataCamp | February 2025

PROJECTS

FYP (Health Care Model)

A fully functional system which provides the following services in the hospital such as:

- Appointment Scheduling
- Doctor availability
- Lab Prescription
- Add permission and role of actors
- Other services such as Surgery, radiology, pathology are provided
